

Environmental Policy Statement

In support of the Volac Business Policy, this Environmental Policy statement applies to all premises and activities within the scope of Volac International Ltd at Felinfach.

This site is a large dairy plant, employing membrane filtration processes, evaporation and spray drying to produce a range of milk replacers for the young animal feeds market, and nutritional ingredients for the food industry.

Volac have recognised the need to manage their environmental impact at Felinfach, and are committed to maintaining and developing an Environmental Management System which meets the requirements of, and is certified to ISO 14001:2004.

Specifically, Volac is committed to:

- the prevention of pollution through suitable process design, waste management and the efficient use of materials and resources;
- the use of our Environmental Management System to drive continuous improvement in respect of Volac's environmental aspects;
- compliance with all relevant environmental legislation, regulations and any other requirements to which we subscribe;
- meeting and exceeding, where possible, the specific requirements relating to our PPC Permit.

This statement will be reviewed at least every two years for continued suitability to Volac's business. The statement is communicated to all site employees and is available to the public via the Volac website.

Signed:

Jonathan Hogg
Factory Manager, Felinfach
